

Name: Nuno Barreto

Title: Web Developing with HTML Mason and CSS Layout

Length: Tutorial of 3 hours

Description:

The target of the tutorial is to help people learn how to use Mason for web programming and CSS for content layout. Some web experience is recommended.

Outline:

- Mason basics
- Organizing a web site using Mason
- CSS for content layout
- How to use all of it together.

Biography:

I have been a web developer for 5 years. Most of my experience is with Perl and Mason. One of my targets as a developer is to have very well organized projects. At the moment I am one of the Sapo web developers, working with the portal.
